

THE NEW MORRIS TEN

A part cutaway drawing of the sliding roof coachbuilt saloon which gives an excellent idea of the mechanical layout and the generous dimensions of the four-seater body. The fixed head model is identical except for the fact that bumpers and a luggage grid are not fitted. The specification includes Triplex glass throughout, door locks and pockets, Karhyde upholstery, electric screen wiper and a full range of instruments in addition to other items explained in the lettering. A full technical description of the car appears elsewhere in this issue.
